

Kioxia Full GEO Monitoring Dashboard

Executive Summary

Kioxia has moderate visibility (37.77%) in AI-generated search results but is often overshadowed by competitors like Samsung and Western Digital. Brand recommendation rate is low (10%), and Kioxia is rarely the top recommended brand. Competitor pressure is high, with Samsung and Western Digital dominating comparisons. Kioxia’s narrative control is weak, as it is frequently compared but not preferred. Trust signals are mixed, with some positive mentions but also risk flags around warranty, support, and mixed reviews. Priority actions include improving brand recommendation through stronger value propositions, addressing trust gaps with first-party content, and increasing visibility in enterprise and consumer segments.

Metric	Value
Total DeepSeek calls	62
Monitoring probes	60
Successful probes	60
Brand mention rate	63.33
Brand recommendation rate	10.0
Avg citation likelihood	2.19

Call Ledger

Call	Stage	Type	Query	Tokens	Success
call_0001	01_monitoring_plan_generation	setup		5682	True
