Overall	Gap to leader	DeepSeek calls	Pages crawled
43.65	41.35	13	23 / 25

Executive Summary

Kioxia has solid technical foundations but lags in GEO maturity, especially in visibility and outcome dimensions. Competitors like Samsung and Micron dominate search and AI surfaces. Urgent actions needed: boost brand content in Chinese, create comparison pages, implement schema markup, and build trust signals. Without intervention, Kioxia risks being invisible in AI-driven discovery.

Competitor Leaderboard
